

Project Performance Test

Date	14 July 2026
Team ID	
Project Name	Plugging into the Future: An Exploration of Electricity Consumption Patterns
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Successfully imported and rendered electricity consumption dataset (January 2019–December 2020) in Tableau. Data contains state-wise electricity consumption records covering pre-lockdown, lockdown, and post-lockdown periods.
2.	Data Preprocessing	Removed duplicate records, verified data types, handled missing values, formatted, created Year and Month fields, grouped states into regions (North, South, East, West) and validated the dataset before visualization
3.	Utilization of Filters	Applied interactive filters for Year, Month, State, Region, and Lockdown Period (Before/During/After) to enable dynamic dashboard exploration.
4.	Calculation fields Used	Created calculated fields such as Total Consumption, Monthly Average Consumption, Year-over-Year Growth (%), Recovery Rate, Running Total, Rank of States, and Lockdown Classification.
5.	Dashboard design	No of Visualizations / Graphs – 7 1. Overall Electricity Consumption Trend (Line Chart) 2. Regional Consumption Comparison (Bar Chart) 3. India State-wise Consumption Map (Filled Map) 4. Lockdown Impact Analysis (Area/Line Chart) 5. Recovery After Lockdown (Bar Chart) 6. Top & Bottom Consuming States (Horizontal Bar Chart) 7. Seasonal Monthly Heat Map
6	Story Design	No of Visualizations / Graphs -7 Story Point 1: Overall Consumption Trends (2019–2020) Story Point 2: Regional Variations in Electricity Demand Story Point 3: COVID-19 Lockdown Impact Story Point 4: State-wise Recovery Analysis Story Point 5: Top & Bottom Electricity Consumers Story Point 6: Seasonal Consumption Patterns Story Point 7: Key Findings and Conclusions
